

WHISPER 9 (9mm)

OEM Product Specification Sheet

The **WHISPER 9** pistol suppressor is a fantastic combination of science and performance blended into one product.

Whisperchicks had access and clearance to use the two most advanced particle and gas flow simulations in existence, running weeklong simulations on some of the fastest supercomputers available. With this experience, Whisperchicks has the unique ability to strip the hot muzzle blast away from the projectile to progressively cool and lower the pressure to a controlled release that results in lower dB.

Whisperchicks does this in a way that reduces backpressure and is superior at managing the heat to make a more durable suppressor. Most importantly we designed a way to do this without reducing the weapons accuracy. In fact, using our suppressors often increases accuracy.

Key OEM Features

The **WHISPER 9** has the smallest diameter 9mm on the market, allowing it to work with most standard height handgun sights.

The **WHISPER 9** has the smallest and lightest Booster/Nielsen device made, and it works when others don't.

Modular Length of 4.81" or 8.19" accommodates both stealth dB reduction and hearing-safe tactical sizes.

Small equals lightweight but we also incorporate a mix of materials including our high purity Grade-23 Ti64V ELI Cores and other important components.

Caliber: 9mm
Construction: Ti64V ELI Grade 23
Diameter: 1.125"
OAL (w/ booster): 4.81" or 8.19"
Weight: 4.2oz or 5.11oz
Attachments: Booster or Direct Thread
Colors available: Rose Gold, Glacier Black,
Prison Pink, Aztec Tealy
