

WHISPER 22 (.22 Cal)

OEM Product Specification Sheet

WHISPER 22 suppressors are a fantastic first choice for ultimate accuracy in a lightweight and durable design that will last you a lifetime. It is ultra-quiet and easy to service.

Whisperchicks had access and clearance to use the two most advanced particle and gas flow simulations in existence, running weeklong simulations on some of the fastest supercomputers available. With this experience, Whisperchicks has the unique ability to strip the hot muzzle blast away from the projectile to progressively cool and lower the pressure to a controlled release that results in lower dB.

Whisperchicks does this in a way that reduces backpressure and is superior at managing the heat to make a more durable suppressor. Most importantly we designed a way to do this without reducing the weapons accuracy. In fact, using our suppressors often increases accuracy.

Key OEM Features

The **WHISPER 22** is the first 3D-printed serviceable mono-core baffle system to the market. This suppressor is full-auto rated and the only 22LR size Ti suppressor rated to handle 5.56mm.

This monolithic design evolved past traditional asymmetrical baffles with multiple parts that don't align concentrically. The **WHISPER 22** baffle screws directly to the barrel like a muzzle device. Even the end cap is incorporated into the baffle as one solid symmetrical extension of your weapon. The tube has alignment built in to float concentric over the baffle.

The **WHISPER 22** is serviceable and easy to work on with our supplied custom tools.

All Whisperchicks suppressors incorporate our symmetrical gas distribution technology to give you the most accurate weapon available.

Caliber: .22 Cal
Construction: Ti64V ELI Grade 23
Diameter: 1"
OAL (w/ booster): 6"
Weight: 5.44oz
Attachments: Direct Thread
Colors available: Rose Gold, Glacier
Black, Prison Pink,
Aztec Teal
