

WHISPER 556 (5.56mm)

OEM Product Specification Sheet

The **WHISPER 556** suppressor is uniquely designed to deliver virtually zero POI-Shift, extraordinary flash reduction, significant recoil reduction, limited gas to the shooter, and a significant decrease in dB.

The **WHISPER 556** is built to last and is made of Ti 64V ELI (Grade 23) titanium alloy with a high specific strength and excellent corrosion resistance. This material is often used in the manufacture of aerospace, medical and marine components.

Whisperchicks had access and clearance to use the two most advanced particle and gas flow simulations in existence, running weeklong simulations on some of the fastest supercomputers available. With this experience, Whisperchicks has the unique ability to strip the hot muzzle blast away from the projectile to progressively cool and lower the pressure to a controlled release that results in lower dB.

Whisperchicks does this in a way that reduces backpressure and is superior at managing the heat to make a more durable suppressor. Most importantly we designed a way to do this without reducing the weapons accuracy. In fact, using our suppressors often increases accuracy.

Key OEM Features

The exterior surface of the suppressor can be designed to mimic or enhance your current weapon design.

Designed to be HUB 1.375 x 24 compatible so that it fits All HUB QD devices in the marketplace, including our proprietary options.

Caliber: 5.56mm
Construction: Ti64V ELI Grade 23
Diameter: 1.75" / 44.45mm
OAL (w/o mount): 7" (178mm)
Weight (w/o mount): 13.2 oz
Attachments: HUB, Direct Thread, QD
Colors available: Rose Gold, Glacier
Black, Prison Pink,
Aztec Teal
