SUPPRESSORS

WHISPER 9 (9MM)

WHISPER 9: Optimized for Pistol Performance

The only suppressor that allows you to use your pistol's factory sights!

The **Whisper 9** is engineered specifically for pistols, delivering exceptional suppression, smooth cycling, and reliable accuracy. It includes a lightweight booster with a Nielsen device for consistent function across a wide range of handguns.

Engineered for Quiet, Reliable Shooting

The Whisper 9 uses advanced gas-flow design to strip, cool, and reduce pressure behind each shot. This creates excellent sound reduction with minimal backpressure and dependable cycling on semi-auto pistols. Accuracy remains consistent even during longer sessions.

Modular Lengths for Any Setup

The Whisper 9 offers two configurations so you can choose the balance of size, weight, and suppression that fits your shooting style.

- Short: 6.25 inches and 6 ounces for maximum maneuverability
- Long: 8.25 inches and 7.5 ounces for enhanced suppression

Both configurations maintain a slim 1.125-inch diameter for improved sight compatibility.

The Smallest and Lightest Booster on the Market (Included)

Each Whisper 9 ships with a lightweight booster and Nielsen device for reliable operation on tilt-barrel handguns. A direct-thread adapter is available for fixed-barrel platforms and can be purchased separately.

Lightweight Titanium Construction

Built from high-purity Ti64V ELI Grade 23 components, the Whisper 9 delivers strength, heat resistance, and durability without adding unnecessary weight. It is also **fully serviceable**, allowing you to disassemble and clean the core for long-term reliability and consistent performance.

Why Choose the Whisper 9?

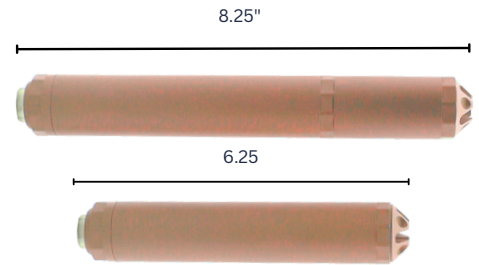

- Pistol-Optimized: Booster with Nielsen device included
- Modular: Two lengths and weights for maximum flexibility
- Ultra-Quiet: Excellent sound suppression with minimal backpressure
- Serviceable Core: Fully disassembles for cleaning and long-term performance
- Slim Profile: 1.125-inch diameter clears most standard-height sights
- Reliable Cycling: Designed for dependable pistol performance
- Titanium Build: Lightweight, strong, and corrosion resistant

The Whisper 9 is more than a suppressor. It is a true game-changer. Experience the fusion of science, silence, and precision, and let the Whisperchicks Whisper 9 improve your shooting.
