

WHISPERCHICKS

SUPPRESSORS

WHISPER 22 (.22 Cal)

WHISPER 22: Lightweight. Accurate. Fully Serviceable.

The **Whisper 22** is light enough for 22LR and tough enough for 22 Creedmoor. **One suppressor to rule them all!** It delivers exceptional suppression, repeatable accuracy, and uncompromising durability, with a fully serviceable 3D-printed monocoire that ensures easy maintenance and long-term reliability.

Engineered for Quiet Performance

The Whisper 22 uses advanced gas-flow design to strip, cool, and slow escaping gases for remarkably quiet shooting with minimal backpressure. The result: smooth cycling, cleaner operation, and a noticeable improvement in accuracy.

Serviceable 3D-Printed Monocoire

The Whisper 22 is the first 3D-printed titanium monocoire suppressor in its class that is **fully serviceable**. The monolithic baffle threads directly to the barrel for perfect alignment, while the titanium tube floats concentrically around the core for consistent precision. Full-auto rated and strong enough to handle everything from .22LR to 5.56.

Accuracy You Can Feel

Our Symmetrical Gas Distribution Technology delivers consistent gas flow throughout the core and removes the inconsistencies that cause POI shift. Expect tight groups shot after shot, even during high-volume sessions.

Titanium Strength, Easy Maintenance

Made from lightweight, corrosion-resistant Ti64V ELI Grade 23 titanium, the Whisper 22 is built for a lifetime of shooting. The serviceable core and included tools make cleaning fast and straightforward, even after heavy use.

Why Choose the Whisper 22?

- Ultra-Quiet: Outstanding sound reduction with minimal backpressure.
- Serviceable: Fully disassembles for easy cleaning.
- Titanium Tough: Lightweight, corrosion-resistant construction.
- Versatile: Full-auto rated; compatible with .22LR through 5.56.
- Accurate: Symmetrical design for consistent point of impact.

The Whisper 22 redefines suppressors with unmatched silence, accuracy, and durability. Elevate your shooting with the Whisperchicks Whisper 22.

Please see website for available colors.

Whisper 22 - Teal

3D-Printed Titanium Monocoire

Rated as follows:

- 22LR Belt Fed: 200 rounds before cooling
- 17HMR: 60 rounds before cooling
- 5.7x28mm: 45 rounds before cooling
- 5.56 / 16"+ (no SBR) 30 rounds before cooling
- 22-250: 6 rounds before cooling
- 22 Creedmoor: 4 rounds before cooling

Construction: Titanium

Finish: Cerakote

Length: 6"

Diameter: 1"

Weight: 5.44oz

Attachments: 1/2x28 Direct Thread

Sound Reduction: Up to 30dB
